Education

Sarah Lawrence College

I studied at SLC for three years. My focus has been on technology and graphic design. I am interested in the history and craft of typography and book layout, and the influence of technological developments on the way we use and present language.

Managing Director

Sadie Lou, Student Magazine and Website 2007–2008

As Managing Director, I was responsible for overseeing the design of the website sadielou.net as the resources sections grew and as new material was published. I also managed the editorial workflow, overseeing a 12-person editorial team.

Research Assistant

Dan King, Mathematics professor 2006

I worked with Dan and a group of peers to explore the mathematical themes in the short fictions of Argentine writer Jorge-Luis Borges. Our work was primarily reading and discussion, to help Dan prepare a course he taught in the subject the following year.

Founding Director

Sadie Lou, Student Website 2006

In 2006, I established Sarah Lawrence College's student-run website, building the site from scratch, attaining funding, and hiring three other managers.

Design Editor

The Phoenix, Student Newspaper 2005–2006

I crafted a clean new design for the paper and implemented design standards, overseeing proper layout and typography for each issue. I also designed a new website for the paper and moved the bulk of the online archive into a new CMS.

Resident Advisor

Sarah Lawrence College Residence Life 2005–2006

I served as Resident Advisor on one of the busiest halls on campus. I was responsible for organizing hall events and being available to my primarily first-year advisees when they needed to talk or when problems on the hall arose.

Web Developer

Information Systems, Sarah Lawrence College 2005

Based on research and surveys, I developed an information architecture for a new student evaluations system. I also did extensive research into web standards and content management systems as the college prepared for a new website.

Skills

Fluent with CSS and XHTML

Proficient with German, PHP, Photoshop, Illustrator, InDesign

Familiar with French, JavaScript, Python, Java, C, Dreamweaver

Other

Puppetry (especially marionette and toy theatre)

Strong language and people skills
